MaTiSSE Smarter Working CALculator

DigitalMeeting are delighted to announce as knowledge exchange partners, the new FREE 'Smarter Working' CALculator from Matisse (Mobile and Teleworking Initiative for a Smarter South East) developed by Computer Assets Limited. Click on this link [Savings Calculator - See How Much Smarter Working Could Save You.](#)

The CALculator provides companies large or small, detailed, customised analysis within seconds on cost savings that can be achieved. Managers can start to assess how even relatively small changes can impact and make significant savings.

The CALculator also computes the costs necessary to set up a productive and appropriate home and or remote working infrastructure, with staff spending up to 20% of their take home pay on simply getting to and from work the demand on employers from employees to provide flexible working conditions is increasing.

Finally The CALculator displays a projected year 1 and 2 savings report that can be emailed to businesses email address.

In a time where businesses must slim-line its operations to survive it has become imperative to review business models and make important decisions about whether implementing Smarter Working practice is something that a company can and should sensibly do.
